

Integrated Data Protection Appliance (IDPA) Test Drive™ for Technical Decision Makers

We are pleased to invite you to a one-day workshop on Dell EMC IDPA DP4400.

The Dell EMC IDPA Test Drive describes how Dell EMC is shaking up the data backup and recovery world with a new line of products which address data protection for hyper-converged infrastructures, cloud systems, and multi-locations ensuring consistent backup and reliable recovery across all data.

Designed for end user technical decision makers and solution architects who are responsible for storage and data protection solutions, the IDPA Test Drive includes not just a group discussion of capabilities and use cases, but also a range of hands-on activities that allow you to experience the product and understand the relevance to your organization.

The IDPA Workshop will cover:

- Lesson 1: IDPA Overview and Value Prop
- Lesson 2: Implementation and Features
- Lesson 3: Hardware Overview

Lab

IDPA Management v2.3

- Module 1: View the Management Structure
- Module 2: System Management
- Module 3: Restore and Search Image Level Backups
